Session 2 in a NutShell

`grep` = search for a pattern
          Usage: `grep "pattern" file.txt`
          `-v` = print all lines that do not match pattern
          `-P` = interprets regular expressions (i.e. "\t", "\n")

`sort` = sorts a file
          Usage: `sort file.txt`
          `-k1` = sorts by column1
          `-k2,2 -k1,1` = sorts by column2, then by column1
          `-r` = sort in reverse
          `-n` = sort numerically (integers and decimals)
          `-g` = sort numerically (integers, decimals, & scientific)
          `-u` = returns unique lines

`vi` = text editor (see VIM Cheat Cheat)
